Fan/Fixture Box Kit for Suspended Ceilings

Lower Installed Cost • Heavy-duty Plated Steel

FBRS420SC
Fan/Fixture Box Kit
Patent pending

Designed just for mounting a fan or fixture on a suspended ceiling grid, Arlington's FBRS420SC fan/fixture box kit saves money! And 30 minutes of installation time.

The box/bracket assembly ships with the box mounted firmly on-center, with its plastic ends in position and tightened to fit a 24" grid. There's no need to adjust the box or bracket if the box is installed in the center of a ceiling grid.

There are no parts to lose! FBRS420SC ships fully assembled. Installation and adjustment screws ship parked in place. There's an installed NM cable connector too.

- Adjustable mounting bracket
- 2" deep, 20.0 cubic inch box
- Meets new UL standards
- UL rating: 70 lb fan or fixture
CSA: Acceptable for fan support

Catalog Number	UPC/DEI/NAED Mfg. #018997	Description	Box	Unit Pkg	Std Pkg
FBRS420SC	75300	Fan/Fixture Box Kit for Suspended Ceiling	2" deep 20.0 cubic in.	1	5

Kit includes box/bracket assembly with turnbuckle, 12' heavy-duty chain, and (2) "S" hooks.

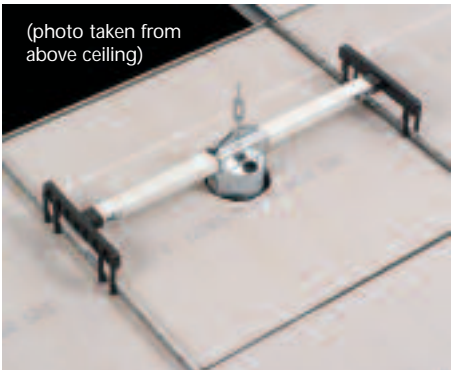

Fan/Fixture Box Kit for Suspended Ceilings

Ships Fully Assembled • Fully Adjustable Mounting Bracket

Kit includes box/bracket assembly with turnbuckle, 12' heavy-duty chain, and (2) "S" hooks.

1 Cut a 4-1/16" diameter hole in the center of a 24" ceiling tile.

2 Place box over hole. Snap plastic ends of support bar over the ceiling grid (tees).

3 Use the "S" hooks provided to attach chain to turnbuckle, and chain to the overhead support. Use turnbuckle to apply tension to the chain, so it supports the weight of fan.

4 Remove captive screws (shown above). Use them to install the fan or fixture per manufacturer's specifications, NEC and all local electrical codes.

Cable pulled through installed NM cable connector.
